Professional summary

Self-taught and highly motivated frontend developer with a background in Law and Business, now specialising in web development and UI/UX design. Skilled in HTML, CSS, JavaScript, Tailwind CSS and Figma, with a growing experience in 3D integration using Blender. I bring strong problem solving, adaptability and excellent communication skills with user focused mindset at the core of every project. Currently seeking opportunities to apply my skills, contribute to innovative digital projects and continue developing as a tech professional.

Technical skills

- Languages: **HTML**, CSS, JavaScript and Python
- Frameworks and Tools: **Tailwind CSS**, GitHub, VS Code, **Figma**, Canva, Adobe XD, WordPress and Blender
- Other: Responsive Design, UI Animation, API integration and Wireframing

Projects

Games console inspired portfolio

- Designed an interactive UI mimicking a console menu
- Used Figma and blender to blend 2D/3D visuals
- Emphasised UX, animation and user engagement

DermaCast – weather App based on skin types

- Built using HTML, Tailwind CSS and JavaScript
- Integrated Open Weather API
- Tailored weather advice based on skin conditions (e.g. eczema, dry skin)

RBL Lounge Landing page

- Build using HTML and Tailwind CSS
- Landing page for a hair business

The RBL Edit WordPress demo site

- Built using WordPress using Elementor and oceanwp
- Focused on clean design, mobile responsiveness and basic client ready layout

To-Do List web app

- Built using HTML, CSS and JavaScript.
- This project introduced me to core web development concepts such as dynamic user input, basic logo and DOM manipulation
